Note 1. General principles

1.1. General information

Icade ("the Company") is a French public limited company (SA, société anonyme). Its registered office is situated at 27 rue Camille Desmoulins, 92130 Issy-les-Moulineaux, France.

The Company's consolidated financial statements as of December 31, 2023 reflect the financial position and profits and losses of the Company and its subsidiaries ("the Group"), as well as the Group's investments in equity-accounted companies (joint ventures and associates). They were prepared in euros, which is the Company's functional currency.

As of December 31, 2023, the Group was an integrated real estate player operating as a commercial property investor and a developer of residential and office properties as well as large-scale public amenities.

1.2. Accounting standards

The Group's consolidated financial statements as of December 31, 2023 have been prepared in accordance with the International Financial Reporting Standards (IFRS) as adopted by the European Union as of December 31, 2023, pursuant to European Regulation No. 1606/2002 dated July 19, 2002, and include comparative information as of December 31, 2022 prepared in accordance with the IFRS applicable at the reporting date.

The international accounting standards are issued by the IASB (International Accounting Standards Board) and have been adopted by the European Union. They include the IFRS, the IAS (International Accounting Standards) and their interpretations. These standards are available for viewing on the European Commission's website.

The accounting policies and measurement bases used by the Group in preparing the consolidated financial statements as of December 31, 2023 are identical to those used for the consolidated financial statements as of December 31, 2022, except for those mandatory standards, interpretations and amendments to be applied for annual periods beginning on or after January 1, 2023, which are detailed in note 1.2.1 below.

These consolidated financial statements were approved by the Board of Directors on February 16, 2024.

1.2.1.Mandatory standards, amendments and interpretations adopted by the European Union which became effective for annual periods beginning on or after January 1, 2023

- Amendments to IAS 1 Disclosure of Accounting Policies.
 - These amendments aim to clarify the disclosures to be made in the financial statements regarding material accounting policies ("material" as defined in IAS 1). IFRS Practice Statement 2: Making Materiality Judgements has been amended by adding guidance on how to identify material accounting policy information and examples of how to apply IAS 1 as amended.
- Amendments to IAS 8 Definition of Accounting Estimates.
 - The objective of these amendments is to define accounting estimates as "monetary amounts in financial statements that are subject to measurement uncertainty". They also specify that entities develop accounting estimates if accounting policies require items in financial statements to be measured in a way that involves measurement uncertainty (monetary amounts that are not directly observable).
- Amendments to IAS 12 Deferred Tax related to Assets and Liabilities arising from a Single Transaction.
 These amendments specify how companies should recognise deferred tax when they account for transactions, such as leases, by recognising both an asset and a liability.

These amendments have had no impact on the Group.

- International Tax Reform Pillar Two Model Rules.
 - The 2024 Finance Act transposed Council Directive (EU) 2022/2523 of December 15, 2022 into French law. This directive aims to ensure a global minimum level of taxation of 15% for multinational enterprise groups and large-scale domestic groups in the European Union, known as "Pillar Two".
 - However, uncertainties remain as to how it should be applied, and the OECD regularly publishes administrative guidance on this subject. This guidance is expected to be transposed into French law by an ordinance, since the July 2023 and December 2023 guidance is not at present covered by the 2024 Finance Act.

"Transitional Safe Harbour", i.e. a temporary simplification measure, has been introduced for the financial years 2024 to 2026. This measure enables groups to comply with their GloBE obligations gradually by not having to perform all the calculations required to determine their tax liability for GloBE purposes from the outset in countries where their presence is not significant or where taxation is high.

The Group has applied the amendment to IAS 12 providing for a mandatory temporary exception from accounting for deferred tax associated with top-up tax arising from the Pillar Two rules.

The first impact assessments for this directive were still ongoing at the end of the reporting period. At present, the Group does not expect any significant impact in terms of top-up tax from the entry into force of the Pillar Two framework.

◆ IFRS 17 – Insurance Contracts (replacing IFRS 4).

Initial Application of IFRS 17 and IFRS 9 – Comparative Information.

These amendments are not applicable to the Group.

1.2.2.Standards, amendments and interpretations issued but not yet mandatory for annual periods beginning on or after January 1, 2023

Standards, amendments and interpretations issued by the IASB effective for annual periods beginning on or after January 1, 2024 but not yet adopted by the European Union

- Amendments to IAS 1 Classification of Liabilities as Current or Non-current.
 These amendments aim to clarify the criteria for the classification of a liability as either current or non-current.
- Amendment to IFRS 16 Lease Liability in a Sale and Leaseback.
- Amendments to IAS 7 and IFRS 7 Supplier Finance Arrangements.
- Amendments to IAS 21 Lack of Exchangeability.

1.3. Basis of preparation and presentation of the consolidated financial statements

1.3.1.Measurement bases

The consolidated financial statements have been prepared according to the amortised cost method, with the exception of investment property and certain financial assets and liabilities measured at fair value.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. IFRS 13 – Fair Value Measurement utilises a fair value hierarchy across three levels:

- level 1: fair value measured based on unadjusted prices quoted in active markets for identical assets or liabilities;
- level 2: fair value measured based on models using observable data, either directly (i.e. prices), or indirectly (i.e. data derived from prices):
- level 3: fair value measured based on market data not directly observable.

According to the principle of relevance and the ensuing materiality notion, only information deemed relevant and useful to the users' understanding of the consolidated financial statements is reported.

1.3.2.Use of judgement and estimates

The preparation of consolidated financial statements requires the Group's management to use estimates and assumptions to determine the value of certain assets, liabilities, income and expenses, as well as for the information provided in the notes to the consolidated financial statements.

Due to the uncertainties inherent in any measurement process, the Group revises its estimates on the basis of regularly updated information. The future results of the operations concerned may differ from the estimates made at the reporting date of the consolidated financial statements.

The main estimates made by the Group related to the following measurements:

- the fair value of investment property determined based on the valuations carried out by independent property valuers (see note 6.2);
- measurement of credit risk arising from accounts receivable (see note 9.2);
- measurement of revenue based on the percentage of completion method for construction and off-plan sale contracts following the review of property developments whose land is controlled by the Group (see note 9.1).

The accounting estimates used to prepare the financial statements as of December 31, 2023 were made amid a complex and volatile economic environment with persistent inflation and rising interest rates. In 2023, the Group was able to withstand these elevated interest rates through its high levels of fixed rate or hedged debt. However, the Group will continue to pay particular attention to the short- and medium-term outlook for rising interest rates in the financial markets and their impact on financing costs. For the period ended December 31, 2023, the Group considered the reliable information at its disposal with respect to the impact of this situation.

In addition to using estimates, the Group's management used its judgement to define the appropriate accounting treatment for certain operations and transactions where current IFRS and their interpretations did not specifically address the accounting issues raised.

Management exercised its judgement in:

- determining the degree of control (sole or joint) by the Group over its investments or the existence of significant influence;
- measuring the right-of-use assets and lease commitments that were used in applying IFRS 16 Leases and, in particular, in determining lease terms:
- determining the classification of leases in which the Group is the lessor between operating and finance leases;
- recognising deferred tax assets, in particular tax loss carry forwards;
- determining whether certain assets and related liabilities meet the criteria to be classified as held for sale in accordance with IFRS 5.

1.3.3. Effects of climate change

The 2015 Paris Climate Agreement has stepped up the fight against climate change which lies at the heart of the environmental and societal concerns of major European economic players.

As such, in order to reduce its greenhouse gas emissions, the Group has been on a very ambitious low-carbon pathway for several years and set even higher goals by defining an objective for each business line by 2030 (-60% for Commercial Property Investment and -41% for Property Development).

The Group has also integrated this into its investment and expenditure policy in line with applicable regulations and its strategy to reduce its carbon footprint. As such, funds have been allocated on a yearly basis to finance projects to be undertaken.

For this purpose, when determining the fair value of investment properties, planned investments, including climate-related ones, are reported to the independent property valuers. Such property valuers carry out their work in accordance with their professional standards, as described in note 6.2.1 "Valuation assignments". Based on their knowledge of the market, they found no evidence that sustainability criteria had a material impact on transaction prices in 2023. However, they remain attentive to any changes in the real estate market in this regard.

As of December 31, 2023, the inclusion of climate change effects has had no significant impact on the judgement and key estimates required to prepare the financial statements.

In addition, the Group has continued its sustainable financing strategy following the adoption, at the end of 2021, of a new Green Bond Framework as detailed in note 7.1 "Financial structure and contribution to profit/(loss)".

Note 2. Highlights of the financial year 2023

2.1. Divestment of the Healthcare Property Investment Division

On June 13, 2023, Icade signed a sale and purchase agreement with Primonial REIM and the minority shareholders of both Praemia Healthcare (formerly Icade Santé) and IHE. This agreement provides for the three-stage sale of its entire healthcare property portfolio worth a total of €2.6 billion based on EPRA NTA as of December 31, 2022.

The first stage of the transaction was completed on July 5, 2023. It involved the sale of 63% of Icade's stake in Praemia Healthcare for €1.4 billion, based on a valuation in line with EPRA NTA as of December 31, 2022, after adjusting for the 2022 dividend.

As part of this first stage, Primonial REIM took over management of Praemia Healthcare's property assets as well as IHE's portfolio. In particular, it is responsible for selling the assets in this portfolio at times that optimise their value.

As provided for in the agreements, Icade's remaining stake in Praemia Healthcare is scheduled to be acquired by the end of 2025 by funds managed by Primonial REIM France using their inflows, based on the most recently published EPRA NTA.

On July 5, 2023, Praemia Healthcare also repaid the outstanding balance of its €50.0 million shareholder loan from Icade and exited the cash pooling arrangement in place.

In the Group's financial statements, the Healthcare Property Investment Division's contribution for FY 2022 and H1 2023 was presented in "Profit/(loss) from discontinued operations" under IFRS 5.

In 2023, "Profit/(loss) from discontinued operations" also included the impact of recognising the full gain or loss on the disposal of Praemia Healthcare. Note 3 details the impact of applying IFRS 5 on the financial statements.

Following the completion of the first stage and Icade's loss of control, the Healthcare Property Investment Division was deconsolidated from the Group's financial statements.

As of December 31, 2023, the remaining interests in the Healthcare Property Investment Division were measured at fair value through profit or loss and presented under "Financial assets held for sale" in the consolidated statement of financial position pending completion of the next two stages of the disposal. The change in fair value of the remaining interests in the Healthcare Property Investment Division as of December 31, 2023 was a negative €14 million. It was recognised as a finance expense.

2.2. Investments and disposals by the Commercial Property Investment Division

- The Commercial Property Investment Division invested a total of €259.0 million. These investments related to the acquisition of Ponant B and ongoing development projects such as the Olympic Village, Next, Jump and Grand Central.
- The Commercial Property Investment Division sold assets for a total of €146.2 million. These disposals related to a residual residential portfolio sold to the RLF Group for nearly €40 million and the Eko Active and Grand Central office buildings.

For further information about investments and disposals completed during the period, an analysis has been provided in note 6.1.1 "Investment property".

2.3. Changes in net financial liabilities

The Group's net financial liabilities decreased from €6,573.7 million as of December 31, 2022 to €3,015.9 million as of December 31, 2023, mainly due to the divestment of the Healthcare Property Investment Division as described in note 2.1.

For further information about changes in the Group's finance during the period, a complete review has been provided in note 7 "Finance and financial instruments".

2.4. Dividend distribution

The General Meeting held on April 21, 2023 approved a gross dividend of €4.33 per share for the financial year 2022 and the following payment terms:

- Payment of an interim dividend of €2.16 per share in cash on March 2, 2023 totalling €163.7 million, after taking into account treasury shares; and
- A final dividend payment of €2.17 per share on July 6, 2023 totalling €164.4 million, after taking into account treasury shares.

For further information about the dividends paid out by the Group during the year, an analysis has been provided in note 8 "Equity and earnings per share".

Note 3. Discontinued operations

3.1. Icade's divestment of its healthcare business

The divestment of the Healthcare Property Investment Division's business as described in note 2.1 led the Group to account for the contribution of this division as discontinued operations under IFRS 5:

- Net profit/(loss) from discontinued operations for H1 2023 and FY 2022 is presented in the income statement as "Net profit/(loss) from discontinued operations" (see note 3.3);
- Net profit/(loss) from discontinued operations for the period includes the full gain or loss on disposal of the healthcare business less the costs associated with its sale;
- Net cash flow from operating, investment and financing activities from discontinued operations for the period is presented in the Group's cash flow statement for the current period and comparative period.

3.2. Financial statements for discontinued operations

The financial statements of the Healthcare Property Investment Division, which has been reclassified as discontinued operations, are detailed below:

Note 4. Scope of consolidation

ACCOUNTING PRINCIPLES

Consolidation principles

The consolidated financial statements include the financial statements of fully consolidated subsidiaries as well as the Group's investments in joint ventures and associates, which are accounted for using the equity method. The consolidation method is determined in accordance with the degree of control by the Group.

Subsidiaries

A subsidiary is an entity that is directly or indirectly controlled by the Group. Control exists when the Group:

- has power over the entity in terms of voting rights;
- has rights to variable returns from its involvement with the entity;
- has the ability to use its power to affect the amount of these returns.

Potential voting rights as well as the power to govern the financial and operating policies of the entity are also among the factors taken into account by the Group in order to assess control.

Subsidiaries are fully consolidated from the date the latter acquires control over them until the date that such control ceases.

Non-controlling interests represent the share of interest which is not directly or indirectly attributable to the Group. These are presented in equity as "Non-controlling interests" and in the income statement as "Net profit/(loss) attributable to non-controlling interests".

All intragroup transactions and balances between the Group's subsidiaries are eliminated on consolidation.

Joint ventures and associates

A joint venture is an entity over which the Group exercises joint control by virtue of a contractual agreement. Joint control exists where unanimous consent of the parties that have joint control is required in the choice of financial and operating policies relating to the entity.

An associate is an entity in which the Group has significant influence over the financial and operating policies but not control or joint control.

Joint ventures and associates are consolidated using the equity method from the date on which joint control (for joint ventures) or significant influence (for associates) commences until the date on which joint control or significant influence ceases.

The consolidated financial statements include the Group's share of changes in the net assets of equity-accounted companies and its share of the net profit/(loss) of these companies. Only intragroup profits and dividends are eliminated based on the Group's ownership interest.

Other investments

Where the Group holds an investment in a company in which it does not have direct, indirect or joint control, or significant influence over its financial and operating policies, the investment is recognised as a financial asset at fair value through profit or loss and presented under the relevant heading of the consolidated statement of financial position. The method used for measuring other investments is presented in note 7.1.5.

Business combinations

To determine whether a transaction is a business combination under the revised IFRS 3, the Group analyses whether an integrated set of activities and assets has been acquired and not just property and whether this integrated set includes, at a minimum, an input and a substantive process that together significantly contribute to the ability to create output.

The consideration transferred must include any contingent consideration, which must be measured at fair value.

According to the acquisition method, the acquirer must, at the acquisition date, recognise the identifiable assets, liabilities and contingent liabilities of the acquiree at fair value at that date.

Goodwill is measured as the difference between, on the one hand, the fair value of the consideration transferred and, on the other hand, the net of the acquisition-date amounts of the identifiable assets and liabilities assumed measured at fair value. If positive, goodwill is accounted for on the asset side of the balance sheet. If negative, goodwill may be referred to as "negative goodwill" or "badwill" or "bargain purchase gain" (arising as a result of a bargain purchase) and is recognised immediately in the income statement under the heading "Profit/(loss) from acquisitions".

For business combinations in which the acquirer holds less than 100% of the equity interests in the acquiree, the fraction of interests that were not acquired (i.e. the amount of non-controlling interests) in the acquiree is measured and recognised:

- either at acquisition-date fair value; goodwill is therefore recognised for the portion attributable to non-controlling interests in accordance with the full goodwill method;
- or on the basis of the acquirer's share of the acquiree's identifiable net assets; no goodwill is therefore recognised for the portion attributable to non-controlling interests in accordance with the partial goodwill method.

CONSOLIDATED FINANCIAL STATEMENTS

The Group has 12 months from the acquisition date to definitively determine the fair value of the assets acquired and liabilities assumed. Any adjustment to the fair value of these assets and liabilities which occurred during that period is recognised against goodwill. Beyond that period, any adjustment to the fair value of assets and liabilities is recognised directly through profit or loss.

Costs of business acquisitions are recorded as expenses in "Profit/(loss) from acquisitions" in the consolidated income statement.

Change in the Group's ownership interest in an investment

Changes in ownership interest that do not affect control (additional acquisition or disposal) shall result in a new apportionment of equity between the Group's share and the share of non-controlling interests.

Changes in ownership interest resulting in a change in the nature of control over an entity shall give rise to the recognition of a profit or loss on the disposal and remeasurement of the fair value of the ownership interest retained as a corresponding entry of the profit or loss.

Discontinued operations

According to IFRS 5, a discontinued operation is a component of the Group which has been disposed of or is classified as held for sale, and which represents either a separate major line of business or a geographical area of operations.

If the component qualifies as a discontinued operation, the profit or loss as well as the capital gain or loss from the sale of this operation are also shown, net of taxes and actual or estimated selling costs, as a separate line item in the consolidated income statement.

Cash flow from discontinued operations is also shown separately in the consolidated cash flow statement.

The same accounting treatments are applied to the consolidated income statement and consolidated cash flow statement for the preceding financial year, which are shown as comparative information.

The companies included in the scope of consolidation are listed in note 14.5.

The impact of these changes in scope of consolidation on the main line items of the consolidated statement of financial position is shown in the corresponding notes.

- The divestment of the Healthcare Property Investment Division as described in note 2.1 led to this division's entities being deconsolidated on July 5, 2023, upon completion of the first stage of the transaction under the sale and purchase agreement signed with Primonial REIM;
- Other changes in the scope of consolidation during the financial year mainly resulted from the creation and dissolution of legal entities during the financial year.

Note 5. Segment reporting

ACCOUNTING PRINCIPLES

In accordance with IFRS 8 – Operating segments, segment information must be structured according to the operating segments for which results are regularly reviewed by the chief operating decision maker in order to assess their performance and make decisions about resources to be allocated to such segments. Segment information must be consistent with internal reporting to the chief operating decision maker.

As a result of the divestment of the Healthcare Property Investment Division, the Group is now structured around two business lines, each having its own specific risks and advantages. These two business lines, which constitute the Group's two operating segments under the standard, are as follows:

- the Commercial Property Investment business, which focuses primarily on holding and developing office properties and business parks
 for the rental of these assets and active management of this asset portfolio. Holding company activities are presented in the Commercial
 Property Investment segment;
- the **Property Development** business, which focuses primarily on building property assets with a view to selling them (office and residential properties, large-scale public amenities and healthcare facilities).

The **Intersegment transactions and other items** column includes discontinued operations as well as eliminations and reclassifications relating to transactions between business lines.

The following information is presented in accordance with the same accounting principles as those used in preparing the Group's consolidated financial statements.

The Healthcare Property Investment Division's contribution in FY 2022 and H1 2023 is shown in the column "Intersegment transactions and other items".

Note 6. Property portfolio and fair value

6.1. Property portfolio

6.1.1. Investment property

ACCOUNTING PRINCIPLES

IAS 40 – Investment property defines investment property as property held by the owner to earn rentals or for capital appreciation or both. This category of property cannot be held for use in the production or supply of goods or services or for administrative purposes. Furthermore, the existence of building rights, leasehold rights or building leases also falls within the definition of investment property.

Property that is being developed for future use as investment property is classified as investment property.

In accordance with the option offered by IAS 40, investment property is measured at fair value.

Investment property excluding right-of-use assets relating to building leases

Investment property is initially recognised at cost, which includes:

- the purchase price stated in the deed of acquisition or the construction costs, including non-refundable taxes, after deducting any trade discounts, rebates or cash discounts;
- the cost of restoration work;
- all directly attributable costs incurred in order to put the investment property in a condition to be leased in accordance with the use intended by management. Thus, transfer duties, fees, commissions and fixed legal expenses related to the acquisition, and leasing commissions are included in the cost;
- costs of bringing the property into compliance with safety and environmental regulations;
- capitalised borrowing costs.

Following initial recognition, investment property is measured at fair value.

The fair value of investment property is measured based on independent property valuations whose methods and assumptions are described in note 6.2. The fair values are appraised values excluding duties, except for those assets acquired at the end of the year for which the fair value is measured based on the acquisition price.

Investment property under construction, or undergoing major renovation, is valued according to the general principle of fair value unless it is not possible to determine its fair value reliably and continuously. In the latter case, the property is provisionally valued at cost less any impairment losses.

In accordance with IAS 36, investment property whose fair value cannot be determined reliably and which is provisionally measured at cost is tested for impairment as soon as an indication of impairment is identified (event leading to a decrease in the asset's market value and/or a change in the market environment). If the net carrying amount of the asset exceeds its recoverable amount (market value excluding duties, determined by independent property valuers) and if the unrealised capital loss exceeds 5% of the net carrying amount before impairment, the difference is recognised as an impairment loss.

Investment property which meets the criteria to be classified as non-current assets held for sale is presented as a separate line item in the consolidated statement of financial position (see note 6.1.2) but remains measured at fair value under IAS 40.

The change in fair value of the property portfolio during the period is recognised in the income statement, after deducting capital expenditure and other capitalised costs, such as capitalised borrowing costs and broker fees.

Gains or losses on disposal are calculated as the difference between the proceeds from the sale net of selling costs and the carrying amount of the asset.

Right-of-use assets relating to building leases

For the investment assets whose land base is subject to a building lease the fair value is determined by the property valuers as if the assets were a single building complex, in accordance with the fair value model under IAS 40 and with IFRS 13.

The fair value of the complex is determined on the basis of the expected net cash flows, including the expected cash outflows under the building lease. The latter are also recognised as part of the lease liability measured in accordance with IFRS 16, as described in note 9.3. The Group adds back the value of the lease liability to the value of the investment assets so as not to recognise this liability twice, in accordance with IAS 40.

Borrowing costs

Borrowing costs directly attributable to the construction or production of an asset are included in the cost of that asset until work is completed.

Capitalised borrowing costs are determined as follows:

- where funds are borrowed in order to build a specific asset, the borrowing costs that are eligible for capitalisation are the costs actually
 incurred over the financial year less any investment income on the temporary investment of those borrowings;
- where the borrowed funds are used to build several assets, the borrowing costs that are eligible for capitalisation are determined by applying a capitalisation rate to the construction costs. This capitalisation rate is equal to the weighted average of current borrowing costs for the financial year other than those of borrowings taken out for the purpose of building specific assets. The capitalised amount may not exceed the amount of costs actually borne.

The Commercial Property Investment portfolio consists primarily of investment property. It is valued as described in note 6.2.

Changes in the property portfolio can be broken down as follows:

Investments/Acquisitions

Investments made by the **Commercial Property Investment Division** amounted to €259.0 million during the period and primarily included the following:

- the acquisition of the remaining sections of the Ponant B building in Paris for €48.7 million;
- projects under development for €125.1 million including the Athletes Village (€18.8 million), Jump (€20.2 million), Next (€22.9 million), Défense 2 (€23.6 million), Grand Central (€15.0 million) and M Factory (€9.7 million).
- other investments, encompassing "Other capex" and "Other" for €85.2 million, related mainly to building maintenance work and tenant improvements.

Disposals

Disposals totalled €146.2 million during the period and mainly related to Grand Central, Eko Active and the residual residential portfolio.

6.1.2. Assets held for sale and discontinued operations

ACCOUNTING PRINCIPLES

In accordance with IFRS 5, where the Group has decided to dispose of an asset or group of assets, it should classify it as "Assets held for sale" within the current asset section of the consolidated statement of financial position, if:

- the asset or group of assets is available for immediate sale in its present condition, subject only to terms that are usual and customary for sales of such assets; and if
- it is highly likely to be sold within 12 months.

The liabilities related to this asset or group of assets are also shown separately as "Liabilities related to assets held for sale".

Given the nature of its assets and based on its market experience, the Group generally considers that the only assets or groups of assets falling within this category are those under a preliminary sale agreement.

Assets held for sale relate to:

- Financial assets held for sale, consisting of unconsolidated companies, which are carried at fair value through profit or loss at the end of the reporting period, in accordance with IFRS 9. Their fair value is determined using recognised valuation techniques (net asset value).
- Other assets or groups of assets classified as held for sale are measured in accordance with IFRS 5 at their fair value, which is usually the amount set out in the preliminary sale agreement, net of expenses.

| (in millions of euros) | | 12/31/2023 | 12/31/2022 |
|---|--------|------------|------------|
| Financial assets held for sale at fair value through profit or loss | 7.1.5. | 1,129.7 | |
| Investment property held for sale | | 62.0 | 147.5 |
| Assets held for sale | | 1,191.7 | 147.5 |
| Liabilities from discontinued operations | | 0.8 | 2.3 |

Financial assets measured at fair value through profit or loss that are held for sale related to remaining interests in the Healthcare Property Investment Division (see note 2.1).

Investment property held for sale related to property assets subject to preliminary sale agreements (including Nautilus as of December 31, 2023).

Liabilities related to assets held for sale mainly come from the remaining balance of provisions made for discontinued operations.

6.2. Valuation of the property portfolio: methods and assumptions

6.2.1. Valuation assignments

The Group's property assets are valued twice a year by independent property valuers for the publication of the half-year and annual consolidated financial statements, according to a framework consistent with the SIIC Code of Ethics (sociétés d'investissement immobilier cotées, French listed real estate investment companies) published in July 2008 by the French Federation of Real Estate Companies (Fédération des sociétés immobilières et foncières).

Valuers are regularly selected through a competitive process. They are chosen from among members of the French Association of Property Valuation Companies (Association Française des Sociétés d'Expertise Immobilière, AFREXIM).

In accordance with the SIIC Code of Ethics, after seven years Icade shall ensure that there is an internal turnover of the teams responsible for the valuation of its assets in the selected property valuation company. The valuer signing the valuation may not be appointed for more than two consecutive terms of four years except where the valuer has met the requirement with regard to the internal turnover of the teams.

Property valuations were entrusted to Jones Lang LaSalle Expertises, Cushman & Wakefield Valuation France, CBRE Valuation, Catella Valuation and BNP Paribas Real Estate Valuation. Property valuation fees are billed on the basis of a fixed service fee that takes into account the specificities of the properties (number of units, floor area, number of existing leases, etc.) and that is not based on the value of the assets.

The assignments of the property valuers, whose main valuation methods and conclusions are presented hereafter, are performed according to professional standards, in particular:

- The French Property Valuation Charter (Charte de l'expertise en évaluation immobilière), fifth edition, published in March 2017;
- The Barthès de Ruyter report from the French Securities and Exchange Commission (COB), which is part of the French Financial Markets Authority (AMF), dated February 3, 2000, on the valuation of the property assets of publicly traded companies;
- On an international level, TEGoVA's (The European Group of Valuers' Associations) European Valuation Standards as set out in the ninth edition of its Blue Book published in 2020, as well as the Red Book standards of the Royal Institution of Chartered Surveyors (RICS).

These various texts specify the required qualifications for the property valuers, a code of conduct and ethics, and the main definitions (values, floor areas, rates and main valuation methods).

During each valuation session and when valuers submit their valuation reports, the Group makes sure that the methods used by the different property valuers to value its assets are consistent.

Valuations are presented both inclusive and exclusive of duties, the values excluding duties being net of duties and fixed legal expenses calculated by the property valuers.

Operating properties of significant value, business parks and the Le Millénaire shopping centre are subject to a double appraisal approach. Until their completion, this approach is also applied to the Commercial Property Investment Division's office projects under development (excluding off-plan acquisitions) with a valuation or capex budget over €10 million.

On-site inspections are systematically conducted by the property valuers for all new assets added to the portfolio. Further on-site inspections are then organised according to a multi-year schedule or each time that a specific event in the life of the building requires it (occurrence of significant changes in its structure or environment).

All the assets, including the land bank and projects under development, were valued as of December 31, 2023 according to the procedures currently in place within the Group, with the exception of:

- Properties subject to a preliminary sale agreement as of the end of the reporting period that are valued based on the contractual sale price (or the price agreed as part of exclusive talks if applicable);
- Public properties and projects held as part of public-private partnerships (PPP) which are not subject to a formal valuation due to the
 fact that ownership ultimately returns to the State at the end of these contracts. These assets are included in the value of the Group's
 property portfolio based on their net carrying amount;
- Properties acquired less than three months before the end of the reporting period, which are valued at their acquisition price.

The Group has also implemented a process of internal valuation by its asset management teams in order to verify the asset values obtained by the property valuers and to gain a better understanding of the future performance of the portfolio on the basis of the business plans defined. This process is updated on a yearly basis.

6.2.2.Methods used by the property valuers

Investment property is valued by the property valuers who use two methods simultaneously: the net income capitalisation method and the discounted cash flow method (the property valuer may use the mean of the two methods or the most appropriate method, as the case may be). The direct sales comparison method, which is based on the prices of transactions noted on the market for assets equivalent in type and location, is also used to verify these valuations.

The net income capitalisation method involves applying a yield to income streams, whether that income is reported, existing, theoretical or potential (estimated rental value). This approach may be implemented in different ways depending on the type of income considered (effective rent, estimated rental value or net rental income), as different yields are associated with each type.

The discounted cash flow method assumes that the value of the assets is equal to the present value of the cash flows expected by the investor, including the sale at the end of the holding period. In addition to the resale value obtained by applying a yield to the previous year's rents, cash flows include rents, the different service charges not recovered by the owner and the major maintenance and repair work. The discount rate to be applied to the cash flows is calculated based either on a risk-free rate plus a risk premium (related both to the property market and to the building considered taking into account its characteristics in terms of location, construction and security of income) or on the weighted average cost of capital.

The land bank and properties under development are also appraised. The methods used by the property valuers primarily include the residual method and/or the discounted cash flow method, and also in certain cases the sales comparison method.

The residual method involves calculating the residual value of a project from the point of view of a property developer to whom the land has been offered. From the sale price of the building at the time of completion, the property valuer deducts all the costs to be incurred, including construction costs, fees and profit, finance costs and any land-related costs.

For properties under development, all outstanding costs linked to the completion of the project, along with carrying costs until completion, must be deducted from the buildings' estimated sale price. Projects under development are valued on the basis of a clearly identified and approved project, as soon as the building permit can be processed and implemented.

Regardless of the method used to determine their estimates, property valuers set a value and discount rate in line with the risks inherent in each project and, in particular, the state of progress of the various approval and construction stages (demolition permit, building permit, objections, stage of completion of work, any pre-commitment, or rent guarantee). From the exit value, the property valuers must explain which procedure they followed in estimating the degree of risk and the change in valuation for the building in the light of the circumstances under which they worked and the information made available to them.

It should be noted that, for all of its properties, Icade informs its property valuers of the work scheduled to be carried out over the next 10 years (maintenance, development, refurbishment). In particular, this scheduled work includes the investments needed to implement Icade's carbon reduction strategy and comply with the French decree on the energy efficiency of service sector properties (Décret Éco Énergie Tertiaire) by 2030. Whether using the net income capitalisation method or the discounted cash flow method, these investments have a direct impact on property valuation.

In addition to this scheduled work, valuers rely on their own assumptions regarding the work required to re-let an asset if they presuppose that it will be vacated in their valuation.

Icade also gives the valuers the information they need to correctly assess the fair value of the buildings: leases, occupancy statuses, service charge budgets, etc. Since 2023, Icade has also provided all CSR criteria for its office properties, as defined in the ESG assessment framework

published in 2023 by the French Association of Property Valuation Companies (AFREXIM). These criteria cover levels of electricity consumption, GHG emissions, environmental certification of buildings, proximity to public transport, etc.

Beyond taking into account the impact of work dedicated to sustainable development, the valuers have not, to date, found any evidence that ESG matters are reflected in the prices obtained or obtainable for offices on the French market. The information provided by Icade is nonetheless likely to enhance the valuers' understanding of the properties under review and to reinforce their conclusions about their fair value.

6.2.3. Main valuation assumptions for investment property

Given the limited availability of public data, the complexity of property valuations and the fact that property valuers use the Group's confidential occupancy statuses for their valuations, the Group considered Level 3, within the meaning of IFRS 13 (see note 1.3.1), to be the classification best suited to its assets. In addition, unobservable inputs such as discount rate assumptions and capitalisation rates are used by the property valuers to determine the fair values of the Group's assets.

| Asset types | | Rates for discounting | • | , , | Estimated rental value |
|--------------------------------------|------------------------|-----------------------|--------------|-----------------|------------------------|

⁽a) Not subject to the traditional rules for determining the estimated rental value, due to the layout and highly specific use of the premises.

6.2.4. Fair value sensitivity of property assets

The impact of changes in yields, all else being equal, on the fair value of property assets is presented in the table below. For example, a 50-bp increase in office yields would reduce office values by around 7.1%, i.e. -€307.9 million.

| | Yields (a) | | | | | | |

⁽a) Yield on the operating property portfolio, including duties.

6.3. Change in fair value of investment property

The change in fair value of investment property for the financial years 2023 and 2022 broke down as follows:

| (in millions of euros) | Notes | 2023 | 2022 Restated (a) |
|---|--------|-----------|-------------------|
| Offices | | (1,218.7) | (349.7) |
| Business parks | | (243.1) | (37.9) |
| Other assets | | (4.4) | 0.4 |
| CHANGES IN VALUE RECOGNISED IN THE INCOME STATEMENT | | (1,466.2) | (387.3) |
| Other (b) | | 8.1 | (6.2) |
| CHANGE IN FAIR VALUE OF INVESTMENT PROPERTY | 6.1.1. | (1,458.1) | (393.5) |

⁽a) Reclassification of the Healthcare Property Investment business as discontinued operations in accordance with IFRS 5 (see note 3.3).

The €1,458.1 million decrease in fair value is mainly due to adjusting market values as risk-free rates and financing costs sharply increased.

⁽b) Mainly relates to the straight-lining of assets and liabilities associated with investment property.

Note 7. Finance and financial instruments

7.1. Financial structure and contribution to profit/(loss)

7.1.1. Change in net financial liabilities

ACCOUNTING PRINCIPLES

Financial liabilities

Borrowings and other interest-bearing financial liabilities are valued, after their initial recognition, according to the amortised cost method using the effective interest rate of the borrowings. Issue costs and premiums affect the opening value and are spread over the life of the borrowings using the effective interest rate.

For financial liabilities resulting from the recognition of finance leases, the financial liability recognised as the corresponding entry of the asset is initially carried at the fair value of the leased asset or, if lower, the present value of the minimum lease payments.

Hedging instruments

The Group uses financial derivatives to hedge its exposure to market risk stemming from interest rate fluctuations. Derivatives are used as part of a policy implemented by the Group on interest rate risk management. The financial risk management strategies and methods used to determine the fair value of financial derivatives are set out in notes 7.2.2 and 7.3.

Financial derivatives are recorded at fair value in the consolidated statement of financial position.

The Group uses derivatives to hedge its variable rate debt against interest rate risk (cash flow hedging) and applies hedge accounting where documentation requirements are met. In this case, changes in fair value of the financial derivative are recognised net of tax in "Other items" in the consolidated statement of comprehensive income until the hedged transaction occurs in respect of the effective portion of the hedge. The ineffective portion is recognised immediately in the income statement for the period. Gains and losses accumulated in equity are reclassified to the income statement under the same heading as the hedged item for the same periods during which the hedged cash flow has an impact on the income statement.

Where financial derivatives do not qualify for hedge accounting under the standard, they are classified under the category of trading instruments and any changes in their fair value are recognised directly in the income statement for the period.

The fair value of derivatives is measured using commonly accepted models (discounted cash flow method, Black and Scholes model, etc.) and based on market data.

Breakdown of net financial liabilities at end of period

Net financial liabilities as of December 31, 2023 and 2022 broke down as follows:

⁽a) Including, as of December 31, 2023, €547.8 million in current financial liabilities and €4,519.5 million in non-current financial liabilities.

The €2,892.6 million year-on-year change in gross debt (excluding derivatives) stemmed primarily from:

- the divestment of the Healthcare Property Investment Division (€2.2 billion);
- changes in borrowings from credit institutions and other borrowings:
 - credit lines secured and drawn down for €19.7 million,
 - repayments worth €265.9 million, including €252.0 million in early repayments (€110.9 million relating to Icade and €67.8 million to SAS Tour Eqho, as well as €73.3 million in loans converted into bank overdrafts relating to SAS Neuilly Victor Hugo and SCCV 86 Félix Eboué).
- net decrease in outstanding NEU Commercial Paper for €328.0 million.

The change in cash flow from financing activities in the cash flow statement was a negative €461.2 million. It mainly included cash flow relating to net financial liabilities (€382.4 million increase and €832.0 million decrease) and repayments of lease liabilities recognised under IFRS 16 (€11.6 million).

⁽b) Excluding security deposits paid and security deposits received and held in an escrow account and excluding financial assets at fair value through profit or loss as of December 31, 2023.

⁽c) Cash flow from financing activities.

⁽d) The Healthcare Property Investment Division is no longer consolidated (see note 2.1).

⁽e) Other changes related primarily to cash flow from bank overdrafts and cash and cash equivalents.

7.1.2.Components of financial liabilities

Gross financial liabilities: type of rate, maturity and fair value

Gross financial liabilities at amortised cost, excluding issue costs and premiums and the impact of amortising them by applying the effective interest method, stood at €5,062.8 million as of December 31, 2023. They broke down as follows:

| | Balance sheet | | | | | | | |
|--|---------------|-----------|--------------|--------------|--------------|--------------|-----------|------------|
| | value | Current | | | Non-current | | | Fair value |
| (in millions of euros) | 12/31/2023 | < 1 year | 1 to 2 years | 2 to 3 years | 3 to 4 years | 4 to 5 years | > 5 years | 12/31/2023 |

The average debt maturity (excluding NEU Commercial Paper) was 4.6 years as of December 31, 2023 (5.3 years as of December 31, 2022). As of December 31, 2023, the average maturity was 4.4 years for variable rate debt and 5.5 years for the related hedges, allowing adequate hedging and anticipating coverage of future financing needs.

7.1.3. Derivative instruments

Presentation of derivatives in the consolidated statement of financial position

Derivative instruments consist of interest rate cash flow hedges.

As of December 31, 2023, the fair value of these instruments was a net asset position of €62.4 million vs. €154.3 million as of December 31, 2022.

The detailed changes in fair value of derivatives were as follows for the financial year ended December 31, 2023:

| (in millions of euros) | 12/31/2022 | Acquisitions | Changes in fair value recognised in the income statement | Changes in fair value recognised in equity | Changes in scope of consolidation (a) | 12/31/2023 |

Changes in hedge reserves

Hedge reserves consisted exclusively of fair value adjustments to financial instruments used by the Group for interest rate hedging purposes (effective portion). They totalled €63.7 million as of December 31, 2023.

Hedge reserves as of December 31, 2023 are shown in the table below:

| | | Attributable to | Attributable to |

These derivatives are used as part of the Group's interest rate hedging policy (see note 7.2.2).

7.1.4.Finance income/(expense)

Finance income/(expense) consists primarily of:

- cost of gross financial liabilities (mainly interest expenses on financial liabilities and derivatives) adjusted for income from cash, related loans and receivables;
- other finance income and expenses (primarily including restructuring costs for financial liabilities and non-use fees).

The Group recorded a net finance expense of €69.4 million for the financial year 2023 vs. a net finance expense of €100.7 million for 2022.

⁽a) Reclassification of the Healthcare Property Investment business as discontinued operations in accordance with IFRS 5 (see note 3.3).

7.1.5. Financial assets and liabilities

ACCOUNTING PRINCIPLES

Under IFRS 9, financial assets are classified and measured either at amortised cost or fair value. In order to determine how best to classify and measure financial assets, the Group has taken into consideration its business model for managing such assets and analysed the characteristics of their contractual cash flows. The Group's financial assets fall into two categories:

financial assets carried at fair value through profit or loss:

These assets relate to investments in unconsolidated companies carried at fair value through profit or loss at the end of the reporting period. Fair value is determined using recognised valuation techniques (reference to recent market transactions, discounted cash flows, net asset value, quoted prices if available, etc.);

financial assets carried at amortised cost:

They consist primarily of receivables associated with equity investments, loans, deposits and guarantees paid, contract assets and accounts receivable carried at amortised cost at the reporting date (the latter two categories of other financial assets are detailed in note 9.2.3).

In accordance with IFRS 9, the Group applies the expected loss model for financial assets that requires expected losses and changes in such losses to be accounted for as soon as the financial asset is recognised at each reporting date to reflect the change in credit risk since initial recognition.

⁽b) Relates mainly to the changes in fair value of the remaining interests in the Healthcare Property Investment Division as of December 31, 2023.

⁽c) Includes prepayment penalties for bonds (call premiums) and other borrowings.

Changes in financial assets and liabilities during the period

Changes in other financial assets during the financial year 2023 broke down as follows:

| | | | | | Net charges related to | | | |

⁽a) The Healthcare Property Investment Division is no longer consolidated (see note 2.1).

Other financial liabilities consisted mostly of deposits and guarantees received from tenants for €59.6 million as of December 31, 2023. The non-current portion represents €58.9 million, including €56.7 million for the portion maturing in more than five years.

Maturity analysis of financial assets

A maturity analysis of other financial assets at amortised cost as of the end of the financial year 2023 is shown in the table below:

| | - | Current | Non-current | |
|--|------------|----------|------------------------|-----------|
| (in millions of euros) | 12/31/2023 | < 1 year | > 1 year and < 5 years | > 5 years |

| FINANCIAL ASSETS AT AMORTISED COST | 375.6 | 358.5 | 13.7 | 3.4 |

7.1.6.Cash and cash equivalents

ACCOUNTING PRINCIPLES

Cash includes current bank accounts and demand deposits. Cash equivalents consist of money-market undertakings for collective investment in transferable securities (UCITS) and investments maturing in less than three months, readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, held for the purpose of meeting short-term cash commitments.

Overdrafts are recognised as current financial liabilities.

| (in millions of euros) | 12/31/2023 | 12/31/2022 |
|---|------------|------------|
| Cash equivalents (a) | 788.7 | 245.3 |
| Cash on hand and demand deposits (including bank interest receivable) | 831.5 | 839.4 |
| CASH AND CASH EQUIVALENTS | 1,620.2 | 1,084.6 |

⁽a) Comprising term deposits and money market UCITS.

⁽b) Includes escrowed funds.

⁽c) Financial assets at fair value mainly consisted of investments in unconsolidated companies.

⁽d) Financial assets held for sale at fair value related to the Group's remaining interests in the Healthcare Property Investment Division (see note 2.1).

7.2. Management of financial risks

The monitoring and management of financial risks are centralised within the Financing and Treasury Division of the Group's Finance Department. The Group's Risk, Rates, Treasury and Finance Committee meets on a regular basis with the Group's CEO, Head of Risk and CFO to discuss all matters relating to the management of the Group's liabilities and associated risks.

The Audit and Risk Committee is also informed at least once a year of the Group's financial policy and the monitoring of the various financial risk management policies.

7.2.1.Liquidity risk

A liquidity risk policy provides a framework and limits to the Group's Finance Department in order to ensure that the Group is adequately protected from this risk.

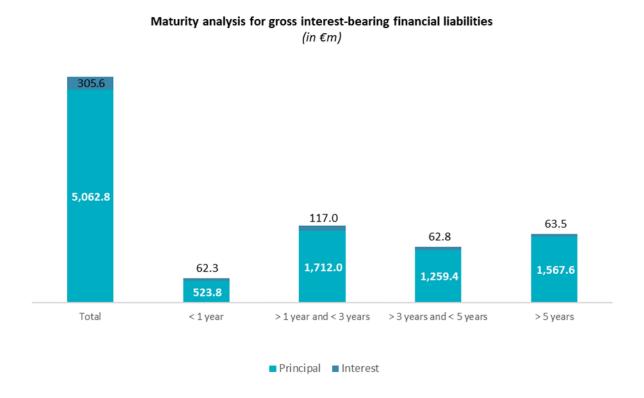

In a still highly volatile market environment in 2023, the Group cautiously strengthened its liquidity position and remains fully able to raise more funds if necessary.

The breakdown of the Group's liquidity position as of December 31, 2023 is as follows:

- an undrawn amount of €1,680.0 million from credit lines (excluding credit lines for property development projects),
- €1,415.6 million in closing net cash.

Excluding NEU Commercial Paper, since it is a short-term source of financing, liquidity amounted to €2,870.6 million as of December 31, 2023 and covered the Group's debt payments up to 2028.

In addition, Icade ensures disciplined management and monitoring of the maturities of its main credit lines as shown in the bar chart below. This chart presents the cumulative future principal repayments on financial liabilities and interest payments as estimated up to their maturity dates.

7.2.2.Interest rate risk

(in millions of euros)

Gross interest-bearing financial liabilities

Interest rate risk is also governed by a specific policy set out by the Group's Finance Department and reported on a regular basis to the Audit and Risk Committee. This risk includes, in the event of increased interest rates, the risk of increased finance expenses related to variable rate financial liabilities and, in the event of reduced interest rates, the risk of reduced finance income related to variable rate financial assets.

To finance its investments, the Group may use variable rate debt, thus remaining able to prepay debt without penalty.

For the past several years, the Group has pursued a prudent interest rate risk management policy with over 90% of its debt at fixed rate or hedged.

⁽a) Despite having a fixed interest rate, NEU Commercial Paper creates exposure to interest rate risk due to its average maturity of only 3 months. As a result, these securities are included in the hedging strategy and are hedged using derivatives in the same way as variable rate debt. (b) Taking into account outstanding hedges for calculating interest rate risk (see note 7.1.3).

As of December 31, 2023, the Group's total debt (excluding debt associated with equity interests) consisted of 86% fixed rate debt and 14% variable rate debt, with fixed rate and hedged debt representing 98% of the total.

The average maturity was 4.4 years for variable rate debt (excluding NEU Commercial Paper) and 5.5 years for the associated hedges.

It should be noted that the Group favours designating its hedging instruments as "cash flow hedges" according to IFRS 9; therefore, any changes in fair value of such instruments are recognised in equity (for the effective portion).

The changes in fair value of hedging instruments, arranged prior to the interest rate increases that began in 2022, had a positive impact on "Other comprehensive income" of €30.0 million as of December 31, 2023.

The accounting impact of a -1% or +1% change in interest rates on the value of derivatives and the Group's finance expense is described below:

| | 12/31/2023 | | |
|--|-----------------------------|--|--|
| (in millions of euros) | | | |

| Derivative instruments | | | |
| Impact of a +1% change in interest rates | 26.0 | | |
| Impact of a -1% change in interest rates | (28.3) | | |

7.2.3. Currency risk

Since the Group does not enter into any foreign currency transactions, it is not exposed to currency risk.

7.2.4.Credit risk

In the course of its business, the Group is exposed to two major types of counterparties: financial institutions and its tenants.

Regarding financial institutions, credit and/or counterparty risk relates to cash and cash equivalents, and to the banks where they are deposited. The investments chosen have maturities of less than one year with a very low risk profile. They are monitored daily and a regular review of authorised investments complements the control process. Additionally, in order to limit its counterparty risk, the Group only enters into financial transactions with major banking institutions and applies a principle of risk dispersion, avoiding concentration of exposure to any single counterparty. These principles are set out in the Counterparty Risk Policy managed by the Group's Finance Department.

As regards its tenants, the Group believes that it is not exposed to significant credit risk thanks to its diversified tenant portfolio in terms of location and individual size of lease commitments. In addition, the Group has introduced procedures to verify the creditworthiness of tenants prior to signing leases and on a regular basis thereafter. In particular, a customer solvency analysis is carried out for the Property Investment business and a check is made on the financing of insurance and guarantees for the Property Development business. These procedures are subject to regular monitoring.

The Group's exposure to credit risk corresponds primarily to the net carrying amount of receivables less deposits received from tenants, i.e. €39.6 million as of December 31, 2023.

7.2.5.Covenants and financial ratios

In addition, the Group is required to comply with the financial covenants listed below, which are covered by the Group's financial risk monitoring and management processes.

| | | Covenants | 12/31/2023 |
|---------------------------------|---------|---------------------------------|------------|
| LTV bank covenant | Maximum | < 60% | 35.1% |
| "Bank" ICR | Minimum | > 2 | 5.59x |
| CDC's stake | Minimum | 34% | 39.2% |
| Value of the property portfolio | Minimum | > €5bn | €6.8bn |
| Security interests in assets | Maximum | < 25% of the property portfolio | 8.4% |

Loans taken out by the Group may be subject to financial covenants—loan-to-value (LTV) ratio and interest coverage ratio (ICR)—and to a clause on the level of control by Caisse des dépôts, the Group's major shareholder, which may trigger early repayment. All covenants were met as of December 31, 2023.

As of December 31, 2023, Caisse des dépôts held 39.44% of voting rights and a 39.20% stake in Icade SA.

LTV bank covenant

The definition of the LTV (loan-to-value) bank covenant was amended in H2 2023 to bring it into line with the definition of the LTV ratio excluding duties. The LTV bank covenant is thus the ratio of the Group's net financial liabilities to the sum of (i) the latest valuation of the property portfolio (excluding duties), (ii) equity-accounted investments (excluding duties), (iii) the value of property development companies, and (iv) financial assets at fair value through profit or loss (on a full consolidation basis). It stood at 35.1% as of December 31, 2023 (vs. 43.5% as of December 31, 2022, based on the former definition). This level is well below the covenant of 60%.

Interest coverage ratio (ICR)

The interest coverage ratio, which is the ratio of EBITDA plus the Group's share of net profit/(loss) of equity-accounted companies to the interest expense for the period, was 5.59x for the financial year 2023 (6.42x in 2022). This ratio has remained high, well above the limit set out in the bank agreements.

7.3. Fair value of financial assets and liabilities

7.3.1.Reconciliation of the net carrying amount to the fair value of financial assets and liabilities

Below is the reconciliation of the net carrying amount to the fair value of financial assets and liabilities as of the end of the financial year 2023:

| (in millions of euros) | Carrying amount as of 12/31/2023 | Amortised cost | Fair value through equity | Fair value through profit or loss | Fair value as of 12/31/2023 |

7.3.2. Fair value hierarchy of financial instruments

The three levels in the fair value hierarchy of financial instruments which are used by the Group in accordance with IFRS 13 are presented in note 1.3.1 on measurement bases.

The financial instruments whose fair value is determined using a valuation technique based on unobservable data are investments in unconsolidated, unlisted companies.

As of December 31, 2023, the Group's financial instruments consisted of:

- derivative assets and liabilities measured based on observable data (Level 2 of the fair value hierarchy);
- financial assets at fair value through profit or loss, measured based on market data not directly observable (Level 3 of the fair value hierarchy);

As of December 31, 2023, the Group did not hold any financial instruments measured based on unadjusted prices quoted in active markets for identical assets or liabilities (level 1 of the fair value hierarchy).

Below is a summary table of the fair value hierarchy of financial instruments as of December 31, 2023:

Note 8. Equity and earnings per share

8.1. Share capital and shareholding structure

8.1.1.Share capital

As of December 31, 2023, the share capital was unchanged compared to December 31, 2022 at €116.2 million and consisted of 76,234,545 ordinary shares. All the shares issued are fully paid up.

As of December 31, 2023, no shares registered directly with the Company (not with an agent of Icade) were pledged.

8.1.2. Shareholding structure

The Company's shareholding structure (number of shares and percentage of share capital) as of December 31, 2023 and 2022 was as follows.

| | 12/31/202 | 23 | 12/31/2022 | | |

8.4. Earnings per share

ACCOUNTING PRINCIPLES

Basic earnings per share are equal to net profit/(loss) for the period attributable to holders of the Company's ordinary shares divided by the weighted average number of ordinary shares outstanding during the period. The weighted average number of ordinary shares outstanding during the period is the average number of ordinary shares outstanding at the beginning of the financial year, adjusted by the number of ordinary shares bought back or issued during the period multiplied by a time-weighting factor.

In calculating diluted earnings per share, the average number of shares outstanding is adjusted to take into account the diluting effect of equity instruments issued by the Company and likely to increase the number of shares outstanding.

Below are the detailed figures for basic and diluted earnings per share for the financial years 2023 and 2022:

8.4.1.Basic earnings per share

⁽a) Reclassification of the Healthcare Property Investment business as discontinued operations in accordance with IFRS 5 (see note 3.3).

⁽b) The weighted average undiluted number of shares is the number of shares at the start of the period plus, as the case may be, the average number of shares related to the capital increase less the average number of treasury shares outstanding.

⁽b) The weighted average diluted number of shares is the weighted average undiluted number of shares adjusted for the impact of dilutive instruments (bonus shares).

Note 9. Operational information

9.1. Income from operating activities

ACCOUNTING PRINCIPLES

The Group's revenue breaks down between revenue excluding other income from operating activities and other income from operating activities.

The Group's revenue excluding other income from operating activities consists of:

- gross rental income from operating leases in which the Group is the lessor and which fall within the scope of IFRS 16. This income
 is generated by the Commercial Property Investment business (lease income from office properties and business parks);
- lease income from finance leases in which the Group is the lessor and which fall within the scope of IFRS 16. This income is generated
 by the Commercial Property Investment business (lease income from property assets leased as part of projects carried out with publicsector partners):
- income from construction contracts and off-plan sale contracts, generated by the Group's Property Development business, as well as income from services provided by the Group, which fall within the scope of IFRS 15 Revenue from contracts with customers.

For all leases in which a Group entity is the lessor and, as a result, which generate income, an analysis is performed to determine whether they are operating leases or finance leases. Leases that transfer substantially all risks and rewards incidental to ownership of the underlying asset to the lessee are classified as finance leases; all other leases are classified as operating leases.

Gross rental income from operating leases

Gross rental income includes rents and other ancillary income from operating leases.

Lease income is recorded using the straight-line method over the shorter of the entire lease term and the period to the next break option. Consequently, any specific clauses and incentives stipulated in the leases (rent-free periods, progressive rent, lease premiums) are recognised over the shorter of the entire lease term and the period to the next break option, without taking index-linked rent reviews into account. The reference period used is the shorter of the entire lease term and the period to the next break option.

Any expenses directly incurred and paid to third parties to set up a lease are recorded as assets in the consolidated statement of financial position, under the heading "Investment property", and depreciated over the shorter of the entire lease term and the period to the next break option.

Uncollected lease income as of the end of the financial year is recognised in accounts receivable and is tested for impairment in accordance with IFRS 9 as described in note 9.2.3.

Service charges are contractually recharged to tenants. To this end, the Group acts as principal since it controls service charges prior to passing them on to the tenants. As a result, the Group recognises such recharges as income in the "Other income from operating activities" line of the consolidated income statement.

Income from finance leases

Income from finance leases includes finance income from property assets leased as part of projects carried out with public-sector partners.

When first recognised, an asset held under a finance lease is presented as a receivable at an amount equal to the net investment in the lease. Such receivable, which includes initial direct costs, is presented in "Accounts receivable" in the consolidated statement of financial position.

Lease income is recognised over the lease term. This income allocation is based on a pattern reflecting a constant periodic return on the net investment in the finance lease. Lease payments received for the period, excluding costs for services, are applied against the gross investment in the lease to reduce both the principal and the unearned income.

Initial direct costs included in the initial measurement of the finance lease receivable reduce the amount of income recognised over the lease term.

Income from construction contracts and off-plan sale contracts

The Group builds and sells residential and office properties under contracts with customers. Such contracts include a single performance obligation for a distinct asset. Under such contracts, the customer obtains control of the asset in proportion to the construction work completed, with the exception of the land, whose control is transferred to the customer upon signing the deed of acquisition.

Therefore, income is recognised over time, pro rata on the basis of cumulative costs incurred at the end of the financial year (including the price of land for off-plan sale contracts) and the progress of sales based on units sold, less any income recognised in previous financial years in respect of projects already in the construction phase at the beginning of the year.

The Group recognises a contract asset or contract liability in the consolidated statement of financial position at an amount equal to cumulative income from construction and off-plan sale contracts to date, for which the performance obligation has been satisfied over time, net of any consideration paid by the customer that has been collected to date, in accordance with the contractual payment schedule. If the amount is positive, it is accounted for as a contract asset in the consolidated statement of financial position; if negative, it is accounted for as a contract liability in the consolidated statement of financial position.

When it is probable that total contract costs will exceed total contract revenue, the Group recognises an onerous contract provision in the consolidated statement of financial position.

The Group's income from operating activities breaks down as follows:

| (in millions of euros) | 2023 | 2022 Restated (a) |
|---|---------|-------------------|
| Lease income from operating and finance leases | 363.9 | 364.0 |
| Income from construction and off-plan sale contracts – Property Development | 1,073.9 | 1,059.3 |
| Income from services provided | 89.8 | 31.6 |
| Other income from operating activities | 129.3 | 113.6 |
| Income from operating activities | 1,656.9 | 1,568.5 |

(a) Reclassification of the Healthcare Property Investment business as discontinued operations in

"Other income from operating activities" mainly relates to service charges recharged to tenants by the Commercial Property Investment Division totalling €121.1 million as of December 31, 2023, compared with €107.1 million as of December 31, 2022.

After taking into account changes during the financial year, which correspond to services rendered and new sales completed during the period, the services not yet rendered under construction contracts and off-plan sale contracts entered into by fully consolidated Property Development companies amounted to €944.1 million as of December 31, 2023. These services will be provided in a more or less linear fashion over the next 24 months.

9.2. Components of the working capital requirement

The working capital requirement consists primarily of the following items:

- inventories and work in progress, accounts receivable, contract assets and miscellaneous receivables on the asset side of the consolidated statement of financial position;
- accounts payable, contract liabilities and miscellaneous payables on the liability side of the consolidated statement of financial position.

9.2.1. Change in working capital requirement

The change in working capital requirement from operating activities in the consolidated cash flow statement can be broken down by segment as follows:

| (in millions of euros) | 2023 | 2022 |
|--|--------|---------|
| Commercial Property Investment | (31.0) | 21.1 |
| Property Development | (40.0) | (144.0) |
| Healthcare Property Investment (discontinued operations) | (8.6) | (68.0) |
| TOTAL CASH FLOW FROM COMPONENTS OF THE WORKING CAPITAL REQUIREMENT | (79.5) | (190.8) |

The change in working capital requirement of €79.5 million as of December 31, 2023, €70.9 million of which relate to Commercial Property Investment and Property Development, is mainly attributable to:

- a decrease of €89.6 million in the Property Development Division's contract assets and liabilities;
- an increase of €48.8 million in the Property Development Division's inventories;
- a decrease of €31.3 million in other receivables and other payables at Group level.

9.2.2.Inventories and work in progress

ACCOUNTING PRINCIPLES

Inventories primarily consist of land and land banks, work in progress and unsold units from the Property Development business.

Inventories and work in progress are recognised at acquisition or production cost. At each reporting date, they are valued at the lower of their cost and net realisable value.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion or the estimated costs necessary to make the sale.

An impairment loss is recognised if the net realisable value is less than the recognised cost.

⁽a) Changes in the impairment loss during the financial year reflect the market environment for property development as of December 31, 2023.

9.2.3. Accounts receivable and contract assets and liabilities

ACCOUNTING PRINCIPLES

Accounts receivable are measured at amortised cost in accordance with IFRS 9. They are initially recognised at the invoice amount and tested for impairment.

See note 7.2.4 for further information on the Group's exposure to credit risk.

See note 9.1 for further details on the accounting principles applicable to contract assets and liabilities.

Changes in contract assets and liabilities and accounts receivable over the financial year ended December 31, 2023 were as follows:

| | | | Net change in impairment losses | Changes in scope of | |
|---|------------|------------|---------------------------------|---------------------|------------|

9.2.4. Miscellaneous receivables and payables

Miscellaneous receivables consisted mainly of tax and social security receivables, agency transactions, advances and down payments to suppliers and prepaid expenses. Miscellaneous payables consisted mainly of payables on investment property acquisitions, tax and social security payables, advances from customers, agency transactions and prepaid income.

As an agent, the Group keeps its principals' accounts and represents them in its own consolidated statement of financial position. Specific items are used within "Miscellaneous receivables" and "Miscellaneous payables". The principals' accounts in the consolidated statement of financial position thus represent the position of managed funds and accounts.

As of December 31, 2023 and December 31, 2022, miscellaneous receivables broke down as follows:

| | | 12/31/2023 | | | | |
|-------------------------------------|-------|-------------------|-------|-------|--|--|

9.3. Lease liabilities

ACCOUNTING PRINCIPLES

In accordance with IFRS 16:

- in the consolidated statement of financial position, "Lease liabilities" (current and non-current liabilities) refers to lease commitments under building leases and property leases;
- in the consolidated income statement, "Other finance income and expenses" includes interest expenses arising from lease liabilities;
- within the "Financing activities" section of the consolidated cash flow statement, "Repayments of lease liabilities" comprises principal
 repayments on lease liabilities. Within the "Operating activities" section of the consolidated cash flow statement, "Interest paid"
 includes interest payments on lease liabilities.

The lease liability is initially measured at the present value of future lease payments. These future lease payments include:

- fixed lease payments less any lease incentives provided by the lessor;
- variable lease payments that depend on an index or a rate;
- residual value guarantees;
- the price of any purchase options where management is reasonably certain that they will be exercised;
- early termination penalties where management is reasonably certain that an early termination option entailing significant penalties will be exercised.

The present value of future lease payments is obtained using the Group's incremental borrowing rate, which varies depending on the remaining lease term.

Lease liabilities are subsequently measured at amortised cost using the effective interest method. In practice, lease liabilities are determined at their net carrying amount plus any interest and less any lease payments made.

Lease liabilities may be remeasured in the course of the reasonably certain lease term in any of the following circumstances:

- lease modification;
- an increase or decrease in the assessment of the lease term;
- an increase or decrease in the assessment of lease payments linked to an index or a rate.

| (in millions of euros) | Total lease liabilities including: | Liabilities related to tangible fixed assets | to investment property |

⁽a) Lease payments amounted to €13.8 million.

In 2023, the expense relating to short-term or low-value leases stood at €1.5 million and €2.9 million, respectively.

⁽b) The Healthcare Property Investment Division is no longer consolidated (see note 2.1).

Note 10. Other non-current assets

10.1. Goodwill, other intangible and tangible fixed assets

10.1.1.Goodwill and other intangible fixed assets

ACCOUNTING PRINCIPLES

Goodwill

For business combinations, goodwill is recognised in the consolidated statement of financial position if the difference between, on the one hand, the fair value of the consideration transferred and, on the other hand, the net of the acquisition-date amounts of the identifiable assets and liabilities assumed measured at fair value is positive (see note 4).

Goodwill is an asset with an indefinite useful life and is therefore not amortised.

Other intangible fixed assets

Other intangible fixed assets mainly comprise acquired contracts and customer relationships, as well as software. Those fixed assets whose useful lives can be determined are amortised using the straight-line method over their estimated useful lives.

| Intangible fixed assets | Useful life |
|--|-----------------------|
| New contracts and customer relationships | Duration of contracts |
| Other (a) | 1to 3 years |
| (a) Mainly software | |

The Group does not hold intangible fixed assets with an indefinite useful life except for goodwill (see above).

Impairment tests on goodwill and other intangible fixed assets

Goodwill

In accordance with IAS 36, goodwill is tested for impairment at least once a year or more often if there is an indication of impairment. The procedures for carrying out impairment tests are described below:

Indications of impairment include:

- an event causing a significant decline in the asset's market value;
- a change in the market environment (technological, economic or legal).

For the Property Development business, goodwill is tested for impairment in the respective group of cash-generating units (CGUs) to which it has been allocated. The fair value of this business is measured as the arithmetic mean of the values obtained with three methods: discounted cash flow (DCF) method, comparable transaction analysis and comparable company analysis. This valuation is based on an independent appraisal.

If the net carrying amount of goodwill becomes higher than its recoverable amount, the difference between those two amounts is recognised as an impairment loss. The recoverable amount is the higher of the fair value less costs of disposal and the value in use (DCF method).

In the DCF valuation method, the cash flows generated by each company over the period of its business plan as well as the cash flows calculated by extending those from the business plan over an additional 10-year period are discounted, and a terminal value calculated by applying a perpetual growth rate to the cash flows is added. The risk-free rate used is the 5-year average yield of the 10-year OAT TEC (variable-rate fungible treasury bond). Three risk premia are added to this risk-free rate: a market risk premium, a size premium and a specific risk premium. The discount rates used are determined before tax.

Reversal of an impairment loss for goodwill is not permitted.

Other intangible fixed assets

In accordance with IAS 36, other intangible fixed assets are tested for impairment if there is an indication of impairment. The procedures for carrying out impairment tests are identical to those employed for property lease assets (see note 10.1.2).

Goodwill

As of December 31, 2023, a goodwill impairment test was performed on cash-generating units (CGUs). It indicated the full impairment of the goodwill, since the recoverable amount of these CGUs was below their carrying amount as of that date.

The recoverable amount of the Residential Property Development CGU is its fair value as of December 31, 2023 as determined by an independent valuer based on a new business plan as of December 31, 2023 and an 11.0% discount rate (unchanged compared to December 31, 2022).

Other intangible fixed assets

| (in millions of euros) | 12/31/2022 | Acquisitions and construction work | Disposals | Net depreciation and impairment charges | Other changes | 12/31/2023 |

| Other intangible fixed assets | 29.4 | 8.0 | (0.0) | (6.5) | 0.6 | 31.5 |

10.1.2. Tangible fixed assets

ACCOUNTING PRINCIPLES

Tangible fixed assets excluding right-of-use assets relating to property leases

Tangible fixed assets mainly comprise office equipment and fixtures which have been depreciated according to the straight-line method over their useful lives.

Right-of-use assets relating to property leases

In accordance with IFRS 16:

- in the consolidated statement of financial position, "Tangible fixed assets" includes right-of-use assets relating to property leases;
- in the consolidated income statement, "Depreciation charges net of government investment grants" includes depreciation charges on these assets.

Right-of-use assets relating to property leases are measured initially at cost, which includes the following amounts:

- lease liabilities measured as described in note 9.3;
- prepaid lease payments.

These assets are depreciated on a straight-line basis over the course of the reasonably certain lease term.

Right-of-use assets relating to property leases may be remeasured over the reasonably certain lease term in any of the following circumstances:

- lease modification;
- an increase or decrease in the assessment of the lease term;
- an increase or decrease in the assessment of lease payments linked to an index or a rate;
- impairment losses.

Reasonably certain lease term

For each lease falling within the scope of IFRS 16, the lease term is assessed by management in accordance with the procedures provided for under the standard.

The lease term used for each lease is the reasonably certain lease term. The latter is the non-cancellable period of a lease adjusted for the following items:

- any option to early terminate the lease if the Group is reasonably certain not to exercise that option;
- any option to extend the lease if the Group is reasonably certain to exercise that option.

Impairment test on tangible fixed assets

In accordance with IAS 36, tangible fixed assets are tested for impairment if there is an indication of impairment. The procedures for carrying out impairment tests are described below.

Indications of impairment include:

- an event causing a significant decline in the asset's market value;
- a change in the market environment (technological, economic or legal).

The test is performed either for individual assets or for groups of assets where those assets do not generate cash flows independently.

If the individual net carrying amount of an asset becomes higher than its recoverable amount, the difference between those two amounts is recognised as an impairment loss. The recoverable amount is the higher of the fair value less costs of disposal and the value in use. The value in use is measured based on the present value of the future cash flows expected to arise from the use of the asset.

If there is an indication that an impairment loss recognised in prior periods may no longer exist and the recoverable amount again becomes higher than the net carrying amount, impairment losses on tangible fixed assets or on right-of-use assets relating to property leases that were recognised in previous financial years are reversed, up to the impairment amount initially recognised less any additional depreciation that would have been recorded had no impairment loss been recognised.

| TANGIBLE FIXED ASSETS | 53.6 | 19.2 | (0.2) | (16.2) | (0.5) | 55.9 |

10.2. Equity-accounted investments

ACCOUNTING PRINCIPLES

The Group's consolidated statement of financial position includes the Group's share (its ownership interest) of the net assets of joint ventures and associates, which are consolidated using the equity method as described in note 4.

Since the Group considers its investments in joint ventures and associates to be part of its operating activities, the share of profit/(loss) of equity-accounted companies is presented within operating income, in accordance with Recommendation No. 2013-01 of the French Accounting Standards Authority (ANC).

The fair value model for measuring investment property (IAS 40) is also applied to investments in joint ventures proportionately to the Group's stake in these entities.

Impairment tests on equity-accounted investments

In accordance with IAS 28, equity-accounted investments are tested for impairment if there is an indication of impairment resulting from a loss event and that loss event has an impact on the estimated future cash flows that can be reliably estimated. Impairment tests are performed in accordance with IAS 36 by treating the investment as a single asset.

If the individual net carrying amount of an investment becomes higher than its recoverable amount, the difference between those two amounts is recognised as an impairment loss. The recoverable amount is the higher of the fair value less costs of disposal and the value in use. The value in use is measured based on the present value of the future cash flows expected to arise from the investment.

If there is an indication that an impairment loss recognised in prior periods may no longer exist and the recoverable amount again becomes higher than the net carrying amount, impairment losses on investments recognised in previous financial years are reversed.

10.2.1. Change in equity-accounted investments

In the consolidated statement of financial position, the change in "Equity-accounted investments" between December 31, 2022 and December 31, 2023 broke down as follows:

| | 12/31/2023 | | | | | |
|---|----------------|------------|---|----------------|------------|---|
| (in millions of euros) | Joint ventures | Associates | Total equity- accounted companies | Joint ventures | Associates | Total equity- accounted companies |

Note 11. Income tax

ACCOUNTING PRINCIPLES

Eligible companies of the Group benefit from the specific tax regime for French listed real estate investment companies (SIICs) or the special regime for *sociétés à prépondérance immobilière à capital variable* (SPPICAVs, i.e. French open-ended collective investment undertakings with at least 51% of real estate assets). Ordinary tax rules apply to the other companies of the Group.

The tax expense for the financial year includes:

- the current exit tax expense for entities under the SIIC tax regime;
- the current tax expense at the standard rate;
- deferred tax income or expense;
- the company value-added contribution (CVAE);
- the net change in provisions for tax risks relating to corporate tax or CVAE.

SIIC tax regime

Icade SA and its eligible subsidiaries have opted for the SIIC tax regime, which provides for:

- an SIIC segment exempt from tax on current income from leasing activities, capital gains on disposals and dividends received from subsidiaries which have opted for the SIIC tax regime;
- a segment that is taxable under ordinary tax rules in respect of other operations.

Entities to which the SIIC tax regime applies must pay out:

- 95% of profits from leasing activities;
- 70% of capital gains on disposals;
- 100% of dividends paid by subsidiaries which have opted for the SIIC tax regime.

Entry into the SIIC tax regime

At the time of entry into the SIIC tax regime, an exit tax of 19% is levied on any unrealised capital gains relating to investment property. A quarter of the tax amount is payable from December 15 of the financial year on which the entity begins to apply the tax regime and the remainder is spread over the following three financial years.

The exit tax liability is discounted according to its payment schedule on the basis of a market rate plus a premium.

The impact of discounting is deducted from the tax liability and the tax expense initially recognised. At the end of each reporting period until maturity, a finance expense is recognised as an offsetting entry for the unwinding of the discount on the tax liability.

Tax at the standard rate

Tax at the standard rate is accounted for in accordance with IAS 12 and calculated:

- on the portion of profit/(loss) that is taxable at the standard rate for companies that have opted for the SIIC tax regime;
- on the profit/(loss) of entities that have not opted for the SIIC tax regime (including companies acquired during the financial year which have not yet opted for the SIIC tax regime as of the end of the financial year);
- on the profit/(loss) of entities acquired during the financial year.

Deferred tax

Deferred tax is calculated on any temporary differences that exist at the end of the reporting period between the carrying amount of an asset or liability and its tax base, and on tax loss carry forwards.

Deferred tax assets and liabilities are measured using the tax rates enacted or substantively enacted by the tax authorities as of the end of the reporting period.

Deferred tax assets are only recognised if they are likely to be used to reduce future taxable income. Deferred tax is recognised using the liability method.

The impact of changes in tax rates and tax rules for existing deferred tax assets and liabilities affect the tax expense for the period.

Deferred tax liabilities recognised by the Group in the consolidated statement of financial position are primarily generated by the mismatch between the percentage of completion method and the completed contract method used for the Property Development Division's projects.

11.1. Tax expense

The tax expense for the financial years 2023 and 2022 is detailed in the table below:

| (in millions of euros) | 2023 | 2022 Restated (a) |
|--|-------|-------------------|
| Current tax at the standard rate | (0.8) | (10.0) |
| Deferred tax | 11.6 | (9.3) |
| Company value-added contribution (CVAE) | (1.5) | (3.0) |
| TAX EXPENSE RECOGNISED IN THE INCOME STATEMENT | 9.2 | (22.3) |

⁽a) Reclassification of the Healthcare Property Investment business as discontinued operations in accordance with IFRS 5 (see note 3.3).

11.2. Reconciliation of the theoretical tax rate to the effective tax rate

The theoretical tax expense for the financial year 2023 is calculated by applying the tax rate applicable in France at the end of the reporting period to profit/(loss) before tax. For 2023, the theoretical tax expense was €(345.4) million. The reconciliation of the theoretical tax expense to the effective tax expense is detailed in the table below:

| (in millions of euros) | 2023 |
|---|-----------|
| PROFIT/(LOSS) FROM CONTINUING OPERATIONS | (1,329.0) |
| Tax expense excluding company value-added contribution (CVAE) | 10.8 |
| Profit/(loss) of equity-accounted companies subject to corporate tax (a) | (2.4) |
| PROFIT/(LOSS) BEFORE TAX AND PROFIT/(LOSS) OF EQUITY-ACCOUNTED COMPANIES SUBJECT TO CORPORATE TAX | (1,337.3) |
| Theoretical tax rate | 25.8% |
| THEORETICAL TAX EXPENSE | 345.4 |
| Impact on the theoretical tax expense of: | |
| - Companies subject to the SIIC tax regime (b) | (322.6) |
| - Permanent differences | (14.5) |
| - Change in unrecognised tax assets (tax loss carry forwards) | 0.8 |
| - Tax borne by non-controlling interests | 1.4 |
| - Other impacts (exit tax, provision for taxes, etc.) | 0.1 |
| EFFECTIVE TAX EXPENSE (c) | 10.8 |
| Effective tax rate | 0.8% |

⁽a) The profit/(loss) of equity-accounted companies directly subject to corporate tax (tax opaque companies) is excluded from the reconciliation since their profit/(loss), net of corporate tax, is included in "Profit/(loss) of equity-accounted companies".

11.3. Deferred tax assets and liabilities

The Group's net deferred tax position as of December 31, 2023 and 2022 broke down as follows by type of deferred tax:

| (in millions of euros) | 12/31/2023 | 12/31/2022 |
|--|------------|------------|
| Deferred tax relating to temporary differences | | |
| - Provisions for non-deductible assets | 4.8 | 3.0 |
| - Provisions for employee benefit liabilities | 1.6 | 1.9 |
| - Provisions for non-deductible liabilities | 4.7 | 4.6 |
| - Finance leases | (3.7) | (3.7) |
| - Other (a) | (16.6) | (24.6) |
| Deferred tax assets related to tax loss carry forwards | 6.8 | 1.2 |
| NET DEFERRED TAX POSITION | (2.6) | (17.6) |
| Deferred tax assets | 18.8 | 11.0 |
| Deferred tax liabilities | 21.4 | 28.6 |
| NET DEFERRED TAX POSITION | (2.6) | (17.6) |

⁽a) Other sources of deferred tax mainly relate to the difference in profits generated between the percentage of completion method and the completed contract method for some Property Development companies and to tax loss carry forwards.

As of December 31, 2023, unused tax loss carry forwards amounted to €194.3 million.

⁽b) Impact on the theoretical tax expense of profits generated by companies that have opted for the SIIC tax regime and whose profits from the tax-exempt segment do not generate corporate tax.

⁽c) The effective tax expense is the tax expense recognised in the income statement excluding CVAE.

Note 12. Provisions

12.1. Provisions

ACCOUNTING PRINCIPLES

A provision is recognised if the Group has a present obligation to a third party that arises from past events, the settlement of which is expected to result in an outflow from the Group of resources embodying economic benefits and the value of which can be estimated reliably.

If the settlement date of that obligation is expected to be in more than one year, the present value of the provision is calculated and the effects of such calculation are recorded as finance income/(expense).

Identified risks of any kind, particularly operational and financial risks, are monitored on a regular basis, which makes it possible to determine the amount of provisions deemed necessary.

| (in millions of euros) | 12/31/2022 | Charges | Use | Reversals | in scope of consolidation (a) | Actuarial gains and losses | 12/31/2023 |
|--|------------|---------|--------|-----------|-------------------------------|----------------------------|------------|
| Employee benefit liabilities | 18.3 | 0.6 | (1.3) | - | (0.8) | (0.4) | 16.4 |
| Other provisions | 63.7 | 18.4 | (13.9) | (8.7) | - | - | 59.5 |
| PROVISIONS FOR LIABILITIES AND CHARGES | 82.1 | 18.9 | (15.2) | (8.7) | (0.8) | (0.4) | 75.8 |
| Non-current provisions | 22.2 | 0.6 | (1.8) | (1.2) | (0.8) | (0.4) | 18.5 |
| Current provisions | 59.9 | 18.4 | (13.5) | (7.5) | - | - | 57.3 |
| including: operating profit/(loss) | | 15.6 | (14.0) | (8.7) | | | |
| including: finance income/(expense) | | 3.4 | (1.3) | - | | | |

(a) The Healthcare Property Investment Division is no longer consolidated (see note 2.1).

12.2. Contingent liabilities

ACCOUNTING PRINCIPLES

A contingent liability is a possible obligation arising from past events where the outcome is uncertain or a present obligation arising from past events whose amount cannot be estimated reliably. Contingent liabilities are not recognised in the consolidated statement of financial position.

As of December 31, 2023, the Group was aware of no contingent liabilities likely to have a material effect on the Group's profits, financial position, assets or business.

Note 13. Employee remuneration and benefits

ACCOUNTING PRINCIPLES

The Group's employees enjoy the following benefits:

- short-term employee benefits (e.g. paid annual leave or profit-sharing plan);
- defined contribution post-employment plans (e.g. pension scheme);
- defined benefit post-employment plans (e.g. lump sum payments on retirement);
- other long-term employee benefits (e.g. anniversary bonus).

These benefits are recognised in accordance with IAS 19 – Employee benefits.

In addition, corporate officers and certain employees have access to other benefits: share subscription or purchase option plans and bonus share plans. These benefits are recognised in accordance with IFRS 2 – Share-based payment.

13.1. Short-term employee benefits

ACCOUNTING PRINCIPLES

Short-term employee benefits are employee benefits that the Group is required to pay to its employees before twelve months after the end of the period in which the employees rendered service providing entitlement to these benefits.

They are accounted for as "Miscellaneous payables" in the consolidated statement of financial position until the date they are paid to the employees and recognised as expenses in the consolidated income statement for the reporting period in which service was rendered.

The provision for the employee profit-sharing plan is determined in accordance with the current Group agreement.

13.2. Post-employment benefits and other long-term employee benefits

ACCOUNTING PRINCIPLES

Post-employment benefits

Post-employment benefits are employee benefits that the Group is required to pay to its employees after the completion of employment.

<u>Defined contribution post-employment plans</u>

Contributions periodically paid under plans which are considered as defined contribution plans, i.e. where the Group has no obligation other than to pay the contributions, are recognised as an expense for the year, when they are due. These plans release the Group from any future obligations.

Defined benefit post-employment plans

These benefits are conditional on completing a certain number of years of service within the Group. They include lump sum payments on retirement and other employee benefits which are considered as defined benefit plans (plans under which the Group undertakes to guarantee a defined amount or level of benefit) such as pensions.

They are recognised in the consolidated statement of financial position on the basis of an actuarial assessment of liabilities as of the reporting date performed by an independent actuary.

The provision which is included as a liability in the consolidated statement of financial position is the present value of the obligation less the fair value of plan assets, which are assets held to fund the obligation.

The provision is calculated according to the projected unit credit method and includes the related social security expenses. It takes into account a number of assumptions detailed below:

- employee turnover rates;
- rates of salary increases;
- discount rates;
- mortality tables;
- rates of return on plan assets.

Actuarial gains and losses are differences between the assumptions used and reality, or changes in the assumptions used to measure the liabilities and the related plan assets. In accordance with IAS 19, actuarial gains and losses on post-employment benefit plans are recognised in equity for the financial year in which they are measured and included in the consolidated statement of comprehensive income in "Other comprehensive income not recyclable to the income statement".

In the event of legislative or regulatory changes or agreements affecting pre-existing plans, the Group shall immediately recognise the impact in the income statement in accordance with IAS 19.

Other long-term employee benefits

Other long-term employee benefits mainly comprise anniversary bonuses. A provision is recorded in respect of anniversary bonuses, which are measured by an independent actuary based on the likelihood of employees reaching the seniority required for each milestone. These values are updated at the end of each reporting period. For these other long-term benefits, actuarial gains or losses for the financial year are recognised immediately and in full in the income statement.

| Closing actuarial debt | (7) = (1) + (2) + (5) + (6) | 14.2 | 16.0 |

For the Group, defined benefit post-employment plans were valued as of December 31, 2023 according to the terms of the Single Group Agreement signed on December 17, 2012.

The following actuarial assumptions were used:

- discount rate of 3.75% as of December 31, 2023 and 3.08% as of December 31, 2022.
 The discount rate used for the period ended December 31, 2023 is defined based on the "iBoxx € Corporate AA 10+" reference index.
 This reference index represents the yields of top-rated corporate bonds as of that date;
- male/female mortality tables:
 - male/female INSEE tables for 2019-2021 as of December 31, 2023,
 - male/female INSEE tables for 2018-2020 as of December 31, 2022;
- retirement age calculated according to statutory provisions.

Rates of salary increase and employee turnover are defined by job, occupational group and age group. Social security and tax rates on salaries are defined by job and occupational group.

|--------------------------------|------------|------------|
| Potential termination benefits | 1.0 | 0.8 |
| TOTAL UNRECOGNISED | 1.0 | 0.8 |

13.3. Share-based payments

ACCOUNTING PRINCIPLES

In accordance with IFRS 2, since share subscription or purchase option plans and bonus share plans are equity instruments subject to vesting conditions, they give rise to the recognition of a staff expense in respect of the fair value of services to be rendered during the vesting period, which is spread on a straight-line basis over the vesting period with a corresponding increase in reserves (equity).

The fair value of the financial instrument granted is determined on the grant date and is based on an assessment performed by an independent actuary. This fair value is not adjusted for changes in market parameters. Only the number of share subscription or purchase options is adjusted during the vesting period based on the satisfaction of service conditions or internal performance conditions.

13.3.1.Description of share subscription or purchase option plans

The characteristics of share subscription or purchase option plans in place as of December 31, 2023 and changes in financial year 2023 are presented in the following table:

| | Characteristics of the plans | | | | | | Changes for | the period | | | | |

⁽a) Adjusted for the employees of the Healthcare Property Investment Division which was deconsolidated from the Icade Group's financial statements on July 5, 2023 (see note 2.1).

⁽b) Bonus share awards were subject to performance conditions that were based 50% on an NTA-based TSR and 50% on the performance of Icade's share price relative to the EPRA Europe ex UK Index (assuming no reinvestment of dividends). These awards may be increased by 15% in the event performance exceeds the benchmark.

⁽c) Bonus share awards are subject to performance conditions that are based 45% on an NTA-based TSR, 40% on the performance of Icade's share price relative to the EPRA Europe ex UK Index (assuming no reinvestment of dividends) and 15% on the reduction in CO_2 emissions in absolute terms (in accordance with SBTi guidelines) compared to their 2019 level. These awards may be increased by 15% in the event performance exceeds the benchmark.

⁽d) Bonus share awards are subject to performance conditions that are based on (i) changes in net current cash flow (NCCF), (ii) changes in share price, (iii) the reduction in CO_2 emissions measured in absolute terms compared to 2022 based on SBTi guidelines and changes in the gender equality policy. These criteria account for 30%, 40% and 30%, respectively, of the performance shares granted. These grants may be increased by 15% if the performance of one of these indicators exceeds that of the respective benchmark.

Note 14. Other information

14.1. Related parties

ACCOUNTING PRINCIPLES

In accordance with IAS 24 – Related party disclosures, a related party is a person or entity that is related to the Company. This may include:

- a person or a close member of that person's family if that person:
 - has control, or joint control of, or significant influence over the Company,
 - is a member of the key management personnel of the Company or of a parent of the Company;
- an entity is considered a related entity if any of the following conditions applies:
 - the entity and the Company are members of the same Group,
 - the entity is a joint venture or associate of the Company,
 - the entity is jointly controlled or owned by a member of the key management personnel of the Group,
 - the entity provides key management personnel services to the Company.

A related party transaction is a transfer of resources, services or obligations between a reporting entity and a related party.

14.1.1. Related parties identified by the Company

Transactions between Icade SA and its subsidiaries have been eliminated on consolidation and are not itemised in this note. Related parties identified by the Company include:

- Caisse des dépôts (which is the Company's major shareholder and controls the Group) and its affiliated companies;
- the Company's subsidiaries;
- joint ventures and associates of the Company;
- the Company's key management personnel, which consists of the persons who, during or at the end of the reporting period, were directors or members of the Executive Committee of Icade SA.

14.1.2. Related party transactions

Transactions have been concluded under normal market conditions, i.e. comparable to those that would usually take place between independent parties.

Remuneration and other benefits for the Company's key management personnel

The remuneration of the Company's key management personnel is presented by type for the financial years 2023 and 2022 in the table below:

14.2. Off-balance sheet commitments

ACCOUNTING PRINCIPLES

Off-balance sheet commitments made and received by the Group represent unfulfilled contractual obligations that are contingent on conditions being met or transactions being carried out after the current financial year.

The Group has three types of commitments: commitments relating to the scope of consolidation, commitments relating to financing activities (mortgages, promises to mortgage property and assignments of claims) and commitments relating to operating activities (including security deposits received for lease payments).

Off-balance sheet commitments received by the Group also include future lease payments receivable under operating leases in which the Group is the lessor and minimum lease payments receivable under finance leases in which the Group is the lessor.

14.2.1. Off-balance sheet commitments

The following tables show the Group's off-balance sheet commitments, both made and received, as of December 31, 2023. The main changes during the period relate to the deconsolidation of the Healthcare Property Investment Division.
